**CURECRETE**

# Revitalize Your Concrete & Terrazzo Floors!

## RETROFIT™ CURECRETE RESTORATION SYSTEM

### A Floor Restoration System Designed Specifically for Janitorial Teams

The **RetroFit** restoration system gives janitorial teams the tools and expertise to revitalize worn concrete and cementitious terrazzo floors - making them look new again!

No specialized grinding or polishing equipment is necessary. Curecrete's trusted and proven process and liquid chemical products will help **remove, resurface, re-strengthen, protect** and **maintain** your floor's revitalized appearance.

***NOTE:** Heavily damaged floors that are beyond the scope of restoration will require the expertise of qualified concrete polishing contractors and specialized equipment. Contact Curecrete for evaluation and contractor recommendations in your area.*

|         |               |         |                  |
|         |               |         |                  |

### Use Your Existing Janitorial Tools & Equipment

The RetroFit restoration system is **designed specifically for use with standard janitorial equipment**. There is no need to purchase expensive and specialized grinding and polishing machines to revitalize your floor's appearance.

Using the highest-quality liquid chemical products available in the concrete densification and polishing industries, diamond grinding and polishing "pucks", and oval diamond adapters, your janitorial crews are well on their way to beautifully restored and refinished floors!
